*Architecture is really about well-being. I think
that people want to feel good in a space ...
On the one hand it's about shelter, but it's
also about pleasure.*

— Zaha Hadid

ENDLESS LOVE®

collection

60x120 | 24"x48"

IL NUOVO CONCETTO DI DESIGN INFINITO

La rivoluzionaria serie di piastrelle in gres porcellanato effetto marmo che permette di combinare insieme le diverse facce per ottenere una grafica continua ma allo stesso tempo casuale.
Disponibile in oltre 60 grafiche diverse.

THE NEW CONCEPT OF INFINITY DESIGN

The revolutionary unique collection of marble effect porcelain tiles perfectly combining different faces.
That allows to get a continuous graphics always varying.
Available in more than 60 patterns.

EdOnyx COLLECTION - SPECIAL EDITION

La serie EdOnyx celebra il trionfo del colore.
È l'edonismo, il piacere puro che nasce dal gioco dei colori caldi e passionali dell'onice calcareo.

The EdOnyx collection celebrates the triumph of colors. It is hedonism, pure pleasure that arises from the game of warm and passionate colors of calcareous onyx.

"In a strange way, architecture is really an unfinished thing, because even though the building is finished, it takes on a new life. It becomes part of a new dynamic: how people will occupy it, use it, think about it."

— Daniel Liebeskind

COS' È L'SPC?

Floor Italia SPC presenta i nuovi listoni di legno artificiale sviluppati con la tecnologia Stone Core. SPC è l'acronimo per Stone Polymer Composite: un nucleo di pietra calcarea (Lime Stone, carbonato di calcio) combinato con polvere di PVC ed uno stabilizzatore.

Diversamente dai pavimenti tradizionali in vinile non c'è alcun elemento interno in plastica.

Parliamo di Eco Futuro: SPC infatti migliora gli ambienti di vita rendendoli salubri e più funzionali.

Il nucleo elastico SPC è rifinito da una copertura UV, un film di carta decorativa resistente all'abrasione che crea un pavimento bello e forte.

WHAT IS SPC?

Floor Italia SPC rigid core flooring combines the strength of stone and the beauty of wood or natural stone / marble. SPC stands for Stone Polymer Composite, the main component - the SPC core is a lime stone (calcium carbonate) combined with PVC dust and a stabilizer. Our SPC flooring is 100% virgin material, there is no recycled material.

SPC flooring is a formaldehyde-free and has no plastic or chemical elements inside, unlike traditional vinyl flooring. Our SPC Flooring is completely safe floor material for residential and commercial environments. This is why we talk about the Eco Future. It is considered as a new generation of floor materials characterized by extreme stability, high performance, 100% waterproofing and eco-friendly attributes.

The SPC core is finished with a Decor film, protective Wear Layer (W/L) and special antibacterial UV Topcoat film to create a beautiful and strong flooring.

COMPOSIZIONE COMPOSITION

- 1 STRATO UV | DURABLE UV LAYER**
Garantisce una migliore resistenza all'acqua, alle macchie e maggiore durata nel tempo.
This top/surface layer of an SPC floor is designed to prevent discoloration, micro scratches and UV radiation.
- 2 STRATO D'USURA
WEAR RESISTANT TRANSPARENT LAYER (W/L)**
Uno strato trasparente che preserva il colore e protegge dall'abrasione.
It provides resistance to scratches and stains and is easy to keep clean.
- 3 DECORAZIONE HD | HD DECORATIVE LAYER**
Un'ampia varietà di texture effetto legno ed effetto pietra.
Regardless of natural wood or stone structure, Floor Italia SPC offers a variety of beautiful designs, that will better showcase your individual style and personality.
- 4 NUCLEO SPC | SPC RIGID CORE
(STONE POLYMER COMPOSITE)**
Un nucleo di pietra calcarea studiato per prevenire sia l'espansione che la contrazione del pavimento, attenuando le imperfezioni del piano sottostante.
This core is made from a combination of natural limestone powder and stabilizers, ensuring a stable and waterproof performance for the floor, prevent expansion and contraction of the flooring and cover subfloor imperfections.
- 5 SISTEMA A SCATTO IMPERMEABILE BREVETTATO
PATENTED WATERPROOF CLICK SYSTEM**
Per un'installazione fai da te, facile e veloce.
For an easy, quick and do-it-yourself friendly installation.
- 6 SOTTOFONDO EVA FOAM | UNDERLAYMENT**
Offre un maggior isolamento termico e acustico con una sensazione naturale a piedi nudi.
Better sound absorption and excellent underfoot feeling.

CONSIGLI PER LA POSA E LA PULIZIA

CONSIGLI PER LA POSA E LA PULIZIA

Floor Italia consiglia sempre la posa in opera del gres porcellanato levigato e satinato con la realizzazione di fughe, o giunti di posa, delle dimensioni minime di 2 mm, o comunque adeguate alle tolleranze dimensionali delle piastrelle. Per fuga si intende lo spazio che separa una piastrella ceramica dall'altra. Va riempito con apposito materiale non ceramico.

Le fughe possono esaltare il dinamismo ed i movimenti prospettici del pavimento evidenziando il reticolo formato dalle piastrelle, oppure, a seconda degli orientamenti progettuali, renderlo meno visibile riducendo lo spessore della fuga e utilizzando stucchi colorati omogenei con i pigmenti del materiale ceramico.

La fuga, oltre che assolvere ad una chiara funzione estetica, contribuisce ad assorbire piccoli scostamenti di planarità che possono realizzarsi in fase di posa in opera. Inoltre elimina le pur minime tolleranze dimensionali delle piastrelle. Il gres porcellanato è caratterizzato da un bassissimo livello di assorbimento d'acqua. La porosità particolarmente ridotta è data dai micropori. La finitura levigata, pur con una grande compattezza del corpo ceramico, presenta una certa microporosità sulla superficie che aumenta i rischi di macchiature.

Per questo le superfici dei prodotti Floor Italia sono attentamente trattate preventivamente, protette fino alla posa in opera anche da un sottile strato cerato.

In seguito, una corretta e continua manutenzione consente di evitare i problemi di macchie irreversibili. In commercio sono reperibili diversi prodotti, sia per la protezione dalle macchie sia per la pulizia dello sporco quotidiano, che rientrano nella categoria dei comuni detergenti lavapavimenti per superfici ceramiche.

Si consiglia la pulizia immediata dei pavimenti dopo la stuccatura per evitare che i materiali utilizzati durante la posa in opera penetrino nei micropori macchiando i pavimenti in modo irreversibile.

PAVIMENTI SOPRAELEVATI

Il gres porcellanato Floor Italia è particolarmente indicato e utilizzato con successo per la realizzazione di pavimenti sopraelevati e facciate ventilate.

Il pavimento sopraelevato è una pavimentazione tecnica ad alte prestazioni che unisce la resa estetica di un pavimento tradizionale alla flessibilità di un pavimento modulare totalmente ispezionabile.

Ogni pannello del pavimento può infatti essere sollevato con una semplice ventosa dando immediato accesso al sottopavimento: questo garantisce la possibilità di ispezione immediata degli impianti sotto esistenti senza bisogno di complessi e invasivi interventi indispensabili con un pavimento tradizionale.

Il pavimento sopraelevato permette inoltre di espandere i suddetti impianti in tempi brevissimi: passare un nuovo cavo dati o una nuova tubazione non comporta la distruzione di ampie aree di pavimento ma solo il sollevare alcune file di pannelli.

Il sistema permette inoltre di sostituire pannelli danneggiati in maniera immediata o di cambiare anche solo parti di pavimento per fini puramente estetici senza alcun tipo di opera muraria.

Suggestions for laying and maintenance

SUGGESTIONS FOR LAYING AND MAINTENANCE

For laying porcelain tiles Floor Italia recommends the creation of joint, or laying joints, at least 1 mm, of a suitable dimension for the dimensional tolerance of tiles. Joint means the space between one tile and another one. It has to be filled in by special non ceramic materials.

Joints can enhance the dynamic movements of flooring, high-lighting the grid made by tiles, or can make it less clear, according to the projectual trends, reducing the joint thickness and using coloured stuccos similar to ceramic material pigments. Joint are also useful in order to absorb any eventual small flatness deviation during the tiles laying. Moreover, they avoid any minimal dimensional tolerances of tiles.

Polished porcelain tiles are characterised by a very low level of water absorption. The extremely low porosity is due to micropores.

Polishing, with a high level of compactness, creates a slight microporosity on the surface that extends the risks of staining. For that reason, surface of Floor Italia items are preventively carefully treated, protected by a thin wax coat until laying. Afterwards, a correct and continuous daily maintenance allow to avoid irreversible staining problems.

Various products are available on the market, either against staining either for cleaning of daily dirt, included among the common detergents for ceramic floors.

RAISED FLOOR

Floor Italia Ceramiche porcelain tiles are particularly indicated and successfully used to realize raised floors and ventilated facades. The raised floor is a high performances technical flooring. It joins the aesthetic yield of a traditional floor to the flexibility of a totally inspectable modular floor.

Every panel of the floor can be raised with a simple suction cap giving immediate access to the under floor: this guarantees the possibility of immediate inspection of the under laid systems without need of complex and invasive interventions that are indispensable with a traditional floor. Moreover the elevated floor allows to expand wide areas of floor but only raising some rows of panels.

Therefore, the system allow to replace damaged panels in an immediate way or also changing only parts of floor for pure aesthetic goals without any type of work building.

Le informazioni contenute nel presente catalogo sono il più possibile esatte, ma non sono da ritenersi legalmente vincolanti. Per esigenze di produzione l'Azienda si riserva il diritto di apportare eventuali modifiche che si rendessero necessarie. Peso, colori e misure sono soggetti alle inevitabili variazioni tipiche del processo di cottura della ceramica. Per ragioni tecniche di stampa i toni riprodotti possono presentare delle alterazioni di colore rispetto ai campioni originali.

FLOOR ITALIA CERAMICHE SI RISERVA LA FACOLTÀ DI MODIFICARE LE INFORMAZIONI TECNICHE RIPORTATE IN QUESTO CATALOGO.

The information contained in this catalogue is as accurate as possible, but cannot be considered as legally binding. The Company reserves the right to make any modifications that become necessary due to production requirements. Weight, colours and dimensions are subject to the inevitable variation typical of the ceramic firing process. For technical printing reasons, the colours shown may slightly differ from the actual tiles.

FLOOR ITALIA CERAMICHE RESERVES THE RIGHT TO MODIFY THE TECHNICAL INFORMATION QUOTED IN THIS CATALOGUE.
